

THE OMAHA DAILY BEE.

E. ROSEWATER, EDITOR. PUBLISHED EVERY MORNING. TERMS OF SUBSCRIPTION...

OFFICES. Omaha, The Bee Building. South Omaha, City Hall Building...

CORRESPONDENCE. Communications relating to news and editorial matter should be addressed: Omaha Bee, Editorial Department...

BUSINESS LETTERS. Business letters and remittances should be addressed: The Bee Publishing Company, Omaha.

REMITTANCES. Remit by draft, express or postal order, payable to The Bee Publishing Company...

STATEMENT OF CIRCULATION. State of Nebraska, Douglas County, ss.: George B. Tschuck, secretary of The Bee Publishing Company...

Table with 3 columns: Date, Circulation, and Total. Rows include dates from 1899 to 1901.

Parties leaving for summer. Parties leaving the city for the summer may have The Bee sent to them regularly...

Chicago should cease aping the ways of the wild and woolly west or import some talent which knows how to do a job of train robbing in latest approved style.

South Omaha has broken the record on pork packing. Since the first day of March over 1,025,000 hogs have been slaughtered and salted in the packing houses of the Magic City.

If Denver proposes to entertain visitors with street duels it should insist upon participants being better marksmen. Spectators three blocks distant are likely to object to being shot.

The Chinese Boxers are again talking of wiping out the foreigners, the soldiers of the powers having mostly left that country. The Chinese Boxer is a valiant fighter when no one is near to fight.

Rainmaker Wright says he will keep up his bombardment until rain results. If he is persistent enough he will get his powder soaked in time, but the public may be skeptical about the cause of the downpour.

A Massachusetts man expresses himself as confident of being able to live sixty days on three plats of water per day. The country is full of men who are willing to bet they can live sixty days and never touch water.

The sultan of Turkey has decided not to order any more warships from German builders because he is angry over the comments of German newspapers. Until the sultan improves his credit materially the shipbuilders will not go into very deep mourning.

Governor Savage appears to be in such great demand at reunions, receptions, old settlers' picnics and watermelon barbecues that he will presently have to call on Acting Lieutenant Governor Steele to fill the executive chair while he is making the rounds.

The milk of human kindness does not seem to permeate among the dairymen in the vicinity of Omaha to any considerable extent. The Retail Milk Dealers' association has resolved to advance the rate on milk to a point where children will have to be weaned.

We are glad to note that even our amiable popocentric contemporary, that predicted utter ruin and disaster as the inevitable consequence of the redemption of Nebraska to republican rule, admits, after six months' trial of the new regime, that "among the good things of earth Nebraska leads them all."

Colorado is celebrating the twenty-fifth anniversary of its admission as a state. Colorado has every reason to rejoice. It is not only an integral part of the best country on earth, but a country which has made Colorado prosperous in spite of itself.

When rockets go up the stick is sure to come down. After a spectacular flight Corn King Phillips has landed with a thud which sadly disfigures his royal personality. Few men have ever demonstrated the capacity to maintain a great business without the foundation of careful training and years of experience.

In a game which has beat the oldest and wisest, as has that of grain speculation, it is not strange that the young man fell out of the parachute.

THE BUCKEYE BRYANITES.

The Bryanites of the country at large will find little encouragement in the result of the movement of the Ohio contingent in behalf of the "peerless leader" and the Kansas City platform. Immediately after the Ohio democratic convention which repudiated Bryan...

But it serves to emphasize the fact shown by the Ohio democratic convention, that Bryanism is dead in the Buckeye state. Of the few men who were present at the gathering in Columbus only two or three have exerted any considerable influence in democratic politics.

The utter and ridiculous failure of this movement is really a harder blow to Bryanism than was the action of the regular democratic convention, because it discloses how complete is the abandonment in Ohio of Bryan and the principles which he represents. It was to have been expected that of the 475,000 voters who supported him last year a sufficient number could have been gotten together in protest against his repudiation to make a respectable showing.

By an overwhelming majority the House of Commons voted a grant of \$500,000 to Lord Roberts for his services in South Africa. The proposition received the support of the liberals and encountered opposition chiefly from the Irish nationalists.

Mr. Balfour's laudation of Lord Roberts undoubtedly voiced the sentiment of Englishmen generally and it is not to be denied that his strictly military operations were highly creditable and fairly entitled him to the honors and emoluments he has received.

Dr. George L. Miller, who claims to be the father of the power canal project, points backward to the time when the opponents of the canal bond proposition called in question the ability of the promoters to guarantee a sufficient quantity of water to insure the canal against drying up in midsummer.

The Cuban constitutional convention has adopted as a whole the electoral bill framed by the commission, but as the various articles are yet to be separately considered and acted upon the measure is likely to undergo some amendment.

After thinking it over, in spite of the assurances of democratic lawyers who insisted the gerrymander of county commissioner districts perpetrated last June was perfectly regular and legal, the democratic members of the board seem to have come to the conclusion that it would not hold water unless it was adopted over again.

Substituting the value of imports from the exports, it appears that in the twelve months just ended the United States is \$664,900,011 ahead on merchandise account, which is much the best showing ever made.

After thinking it over, in spite of the assurances of democratic lawyers who insisted the gerrymander of county commissioner districts perpetrated last June was perfectly regular and legal, the democratic members of the board seem to have come to the conclusion that it would not hold water unless it was adopted over again.

At this time, when there is so much discussion regarding the grain crops and the amount required abroad, the official report of exports is especially interesting in its structure.

Japan is certainly progressing. A company has just been formed in that country which expects to control the tea product of that country and limit the production with a view to increasing prices.

As every voter at the election of president, members of congress and provincial governors must present a certificate of registration and must identify himself, it is apparent that the initial power of the boards of registration would be considerable and important.

At this time, when there is so much discussion regarding the grain crops and the amount required abroad, the official report of exports is especially interesting in its structure.

THE GIST OF THE CONTROVERSY.

The controversy over the replacement of the worn-out Sixteenth street pavement hinges on the question as to who is to pay for the pavement. All our paving in Omaha has been laid under the system of special assessments, by which the owners of abutting property, specially benefited, have been called upon to defray the expense of the improvement pro rata to their holdings.

Another feature which must not be overlooked arises from the fact that no new pavement can be laid on any street in Omaha that has once been paved without a petition from the abutting property owners asking for the improvement.

Another investigation called for. Louisville Courier-Journal. For purposes of general enlightenment we do not have some sort of a commission to report how nearly the corn belt, the rain belt and the prayer belt are synonymous.

Attacking Home Industry. Summing Up the Effect of Populistic Hot Air Threats. J. Sterling Morton's Conservative.

Abate the Nuisance. St. Louis Globe-Democrat. American cities are rapidly becoming a collection of huge fumes smeared with all sorts of pictorial monstrosities.

What the Kains Did. St. Paul Globe. On the whole, notwithstanding the scare the country has had, and not without good reasons, the recent copious rains have done a combined good over the whole country which will average larger than ever before.

More Information Needed. Brooklyn Eagle. Mr. Bryan defends Senator Jones on the ground that his round bale cotton company is not a trust; just a company.

Demand for American Products. New York Tribune. Africa has drawn on America heavy drafts of horses and mules to the profit and satisfaction of American breeders.

Statistics of the Year's Commerce Viewed with Justifiable Pride. New York Tribune. The American will view the statement of foreign commerce for the fiscal year ending June 30, 1901, with justifiable pride.

PERSONAL NOTES. T. Sufferer Tallor of New York is said to have the best library of books on sporting subjects and particularly on riding and fishing, in his country.

T. Jenkins Haines, the author of the sea tales, owns a yacht of his own, which is, most of the time, his home.

Donald G. Mitchell (Ik Marvel) of the class of '41, has consented to deliver the address at the dedication of Woodbridge hall, the new late administration building, at the time of the bi-centennial celebration.

Anders Zorn, the famous Swedish artist, "threatened," as he put it, to some day present one of his pictures to the St. Louis Museum of Fine Arts.

At this time, when there is so much discussion regarding the grain crops and the amount required abroad, the official report of exports is especially interesting in its structure.

Signs of the Times

The long period of active business and consequent prosperity interrupted by the drouth and heat in the west, and the simultaneous strike of the steel workers, is likely to be resumed now that rain has fallen in the west and that the steel strike is about to be called off.

The losses in consequence of the drouth in the west were figured at nearly \$200,000,000, but these also were mainly on paper, and it is now estimated that a great part of the endangered crop will be saved, and at increased prices resulting from a partial failure will bring as much in the market as a full crop.

An excellent sign of the times is that nothing approaching a panic resulted from the threatening aspect of the situation and general business went on as usual, although alarming reports were spread broadcast respecting the failure of crops and a complete suspension of the iron and steel industry.

The steel companies will probably make rather than lose money by the strike. The workers suffer an absolute loss of wages, which can only be made up by working overtime when the mills resume, but this loss might have come upon them without any strike if they had tried to keep steadily at work during the strike.

His Carves Giving Out. Detroit Free Press. Bryan persistently refuses to change his style of pitching and it is a political certainty that he will have to drop back to some one of the minor leagues.

Another Investigation Called For. Louisville Courier-Journal. For purposes of general enlightenment we do not have some sort of a commission to report how nearly the corn belt, the rain belt and the prayer belt are synonymous.

ATTACKING HOME INDUSTRY.

Summing Up the Effect of Populistic Hot Air Threats. J. Sterling Morton's Conservative. The evening of September 26, 1900, will never be forgotten by those citizens who welcomed to Nebraska City that night the peerless leader of the Bryan campaign, Lewis and Constantine Blarney Smyth (nee Smith) for the patriotic purpose of hearing how to "bust" the National Starch trust and how to protect Nebraska City against despoiling men in general and the business in particular.

There is a restaurant on the upper East Side, reports the Tribune, where the reverse state of affairs exists—no place keeps its coat on if he takes a place at one of the tables. It is a large, lofty and well ventilated room, with a bar at one end, four billiard tables in the rear and rows of round tables, at each of which four men may sit comfortably.

One of the odd characters in Brooklyn is a man who is a drunkard only by his ankles down. That is to say, while he never puts a drop of intoxicating liquor into his stomach his feet are confirmed drunkards.

How have the forecasts of that speech been verified? Have the starch works ceased? Are they now being expanded, enlarged and \$50,000 expended in their betterment? And is this industry and is the cold storage plant and is the Morton-Granger packing house the result of the efforts of populism, Bryanism and its expounders?

Recall all the prophecies of that remarkable, rampant oratory at Nebraska City September 26, 1900, and find, if you can, a single statement which has been proved true by subsequent events! Find one economic utterance that has not been demonstrated a lie!

BITS OF LIFE IN GOTHAM.

Midsummer's Lights and Shadows in Greater New York. Bondholders and coupon clippers content with modest dividends have heretofore viewed with speechless admiration the amazing profits of Standard Oil shareholders, frequently reaching the dizzy heights of \$100,000 per annum.

In addition to the extra dividend the surplus of the First National has increased from \$4,750,000 to \$10,000,000. Notwithstanding the big special dividend distribution, the surplus and undivided profits of the institution on July 23 aggregated \$10,102,796.73, or \$1,352,221 in excess of the amount the bank reported on July 1st in its statement to the comptroller of the currency.

The extreme heat has had no effect on the rules against the shirtwaist man in some places in New York, and as a result the customers have been driven to competing restaurants and luncheon places, the proprietors who have their own ideas on the subject cannot be won over to the popular side.

There is a restaurant on the upper East Side, reports the Tribune, where the reverse state of affairs exists—no place keeps its coat on if he takes a place at one of the tables.

One of the odd characters in Brooklyn is a man who is a drunkard only by his ankles down. That is to say, while he never puts a drop of intoxicating liquor into his stomach his feet are confirmed drunkards.
